

Flashing Kits for the Conservation Rooflight®

Suitable for most pitched roofs, utilising flat tiles and slates

The On the Rafter Flashing Kit is designed to be used with all 'On the Rafter' pitched window installations and is suited to almost all types of flat roof tile or slate. It is supplied with flashing at the head and cill, together with a single continuous uPVC soaker at each jamb, designed to be cut at predefined heights to match the finished roof line. Providing that your roof build-up remains below 75mm, your installation will be suitable for a flashing kit.

The Between the Rafter Flashing Kit is designed to be used with pitched window installations and slates when a flush finish is required*. It is supplied with flashing at the head and cill, (please see below to see which one applies to you) together with a single continuous uPVC soaker at each jamb, designed to be cut at predefined heights to match the finished roof line. Providing that your roof build-up remains below 124mm, your installation will be suitable for a flashing kit.

* if applicable

Flashing Kits for the Conservation Rooflights On the Rafter

Model		Price
CR01-2-FK-L	Suitable for use with model CR01-2	£167
