

Opening Options for neo®

Fixed Shut

neo® can be fixed shut. You will need to specify this when ordering your rooflight. The fixing bracket is concealed within the frame. You will only see a discreet white plug in the cill of the rooflight. This is there should you wish to change your opening option in the future.

Manual Handle - Within Hand Reach Only

The manual opening option requires the operator to be able to reach the handle when the casement is in its open position. The average reach for adult males is 667.2mm and for females 556.4mm. neo® has a manual opening distance of 550mm. If you do not think you will be able to reach the handle when open, an alternative opening option should be selected.

Motorised Opening

You may wish to motorise the opening of the roof window. There are two motorised options: Cill Motorised meaning the motor is concealed within the cill of the frame and will cost an additional £374 or Jamb Motorised meaning two motors will be concealed in the Jambs of the frame this will cost an additional £749 on the fixed closed price.

	neo® -05	neo® -06	neo® -07	neo® -08	neo® -09	neo® -10	neo® -11	neo® -12	neo® -13	neo® -14	neo® -15
Manual Opening	£1287	£1257	£1302	£1502	£1515	-	£1302	£1502	-	£1209	£1402
Cill Motorised Opening	£1554	£1524	£1569	£1769	£1782	-	£1569	£1769	-	£1476	£1669
Jamb Motorised Opening	£1929	£1899	£1944	£2144	£2157	-	£1944	£2144	-	£1851	£2044

Please note Jamb Motorised neo® roof windows cannot be changed to a manual opening option once delivered. However, the manual within reach, fixed shut and cill motorised opening options are interchangeable (additional costs will occur if opening option is changed once delivered).
